We would like to make an App where the user can follow their favorite artists and track their growth through Spotify's API.'

Features

- Search for Artists
- Follow Artists
- Track follower gains (between app opening)
- Local Storage DB
- Login with Spotify

Pages

- Main page
 - Favorite artists in a recycler carousel view
 - Search bar on top
- Artist page
 - Stats in a linear scroll view
- Search Modal
 - Customer Search components in a recycler view

WireFrames
